

Benefits obtained from a consistent longterm plan of taking Humisol include:

-  Provides increased resistance to colds and flu, infection and disease
-  Cleanses, neutralizes and removes toxins
-  Regulates your immune system
-  Assists in purging parasites, pathogens and viruses from your body
-  Creates a feeling of well being immediately
-  Restores your body to its optimum potential over time

“A year ago I was diagnosed with hepatitis C. A friend suggested I start taking Humisol. I was tested again six weeks later and the results were negative. The doctors could not believe that the hepatitis C was gone. Thank you, thank you.”  
Gary D.  
Dallas, TX.

“Recently I came down with a bad case of influenza. Normally this leads to severe respiratory distress. Within forty-eight hours, all my symptoms were gone. I am very grateful for this product and I will continue to keep Humisol in my house for myself and family members.”  
Meg C.  
Santa Fe, NM.

“I started recommending Humisol for my HIV+ patients and I am amazed how fast their viral loads are reduced. I plan to use this product with my other patients that are diagnosed with Hepatitis, Epstein-Barr and other various viral infections.”  
M. Peter’s, MD.  
San Jose, CA

“I am 64 and have had genital herpes since I was 21. You can count the years and the number of “stuff” I’ve tried. The pain with this is excruciating. Not with Humisol, it is unbelievable, a real Godsend! Truly, month after month it really does work. I started out with just the Humisol, but now every morning, I take 2 scoops of Cellular PSP, shake in 8 oz. of water and take 2 Humisol capsules with it. Fantastic product, I am a lifetime user, no pain. Truly from my heart, thank you!  
Laura

Health Best Today

Nature's Secret

[healthbesttoday.com](http://healthbesttoday.com)

“A very real threat from emerging viruses does exist and must be taken with the utmost seriousness. Humisol, an age-old substance derived from nature, is being successfully used to treat all kinds of viruses.”  
Dr. Howard Peiper  
Author of best-selling book,  
Viral Immunity with Humic Acid

## Viruses at our doorstep

Viruses recognize no international borders or time zones. They have no obligations to country, race social status, or gender. Rich and poor, alike, are victims of viral infections, which, if given the opportunity, may travel over extraordinary long distances. In our modern world, viruses and other infectious microbes can easily hitch rides on international flights to and from any major city.

## What is a virus?

Viruses are very small. Viruses are so minute they can maintain their ability to infect even after passing through filters small enough to strain out all bacteria.

Viruses are parasites. Viruses are intercellular molecular parasites. They enter the body silently and often without notice. (i.e. HIV, Hepatitis C).

## How viruses enter the body

Viruses typically enter the human body through one of three locations:

- 🍃 **Respiratory tract** (nose, throat, and lungs)
- 🍃 **Gastrointestinal tract** (mouth, stomach, and intestines)
- 🍃 **Genitourinary tract** (sex organs and urinary area)

Viruses gain entry into the body through the respiratory tract when their victims inhale air into which people with that virus have coughed or sneezed. Viruses of the gastrointestinal tract generally enter the body in food contamination. Viruses gain entry through the genitourinary tract through sexual intercourse, such as HIV and herpes.

## Unlocking Mother Earth's Chamber of Secrets

Sealed away from wind and rain for millions of years are great deposits of animal and plant material that have decomposed and then been compressed together by the millions of tons of earth over them. This process locks in their nutrients providing seventy-two natural ingredients, and one of them is humic acid.

Nutritional experts now know that in addition to vitamins and minerals, humic acid is a third and vitally important nutrient required for health. These breakthrough discoveries are supported by published and medical research coming from top institutions around the world, medical schools, hospitals, clinics and pharmaceutical labs.

## Welcome to the viral realm ~ 4000 Types of viruses

There are 4,000 types of viruses, with new viruses being discovered regularly. Classifications of viruses are based whether they are DNA or RNA.

### DNA types are viruses that cause:

Chicken Pox, Herpes Simplex, Smallpox, Shingles, Warts, Hepatitis B, Common Cold

### RNA types are viruses that cause:

Yellow Fever, Bronchitis, Rubella, Measles, Hepatitis, Polio, Influenza, HIV

## New Viral Plague

Historically, it appears diseases go into latent or dormant phases and reemerge when conditions are favorable for their proliferations, just as they do in our bodies. What is of concern now is not only the increasing variety of new viruses and other diseases, but also the weakening of our natural immunity from toxic pollutants and stress allowing the spread of potent viruses into areas of dense population. Every element is in place for a new plague.

## Humisol has the Power to Penetrate Even the Deadliest Viruses

Viruses encapsulate themselves in an impenetrable protein barrier where defense mechanisms cannot reach them. Humisol puts a coating around the viruses and preventing the virus from adhering to a healthy cell. The viruses then become vulnerable to attack by the immune system. Yet this is only the beginning. Humisol also has the amazing ability to alert the immune system to the virus or disease invader and to regulate and strengthen the immune system. Scientists have determined that to successfully treat many serious diseases, including those caused by viruses, the immune system needs to be controlled. Humisol is able to do this naturally by suppressing certain immune responses while increasing others.
